

CPD SEMINAR *with*  
**Elizabeth Adalian**

The Welsh School of Homoeopathy is hosting a series of special Continuing Professional Development events and invites you to participate. We are now offering a series of one day events to be held from **10.00 to 17.30** at our premises in Carmarthen.

These events will provide an opportunity to experience and explore in depth the Tao of Homoeopathy as practised by some of the most accomplished and well-known practitioners.

We have invited **Elizabeth Adalian** to host the next of these events which will take place on **Monday October 14th 2019**.

The cost for this seminar is **£65** and includes refreshments but not lunch. If you would like to join us for this special event then please complete the attached application form.

**Elizabeth Adalian**

Elizabeth has been in practice for over 30 years. It was while working in the former Yugoslavia, after the war there, that she realised it was not so much the exposure to war that affected each individual but more what they brought to it from their formative years. This concept has brought transformative results to her cases here in the UK. She has written numerous articles on trauma and Homoeopathy, culminating in her recent book 'Touching Base with Trauma'.

Elizabeth has taught extensively across the UK and abroad. She is a member of the editorial team for 'Homoeopathy in Practice'.

**'Touching Base With Trauma'**

In this seminar Elizabeth sets out to explore why trauma can be so hard to resolve, not only with Homoeopathy but with any medical discipline.

Through the ancestral approach, it can be ascertained that the trauma response is 'calibrated' at birth, representing a culmination of the parents' pre-existing lifestyle choices, belief systems and experiences, as well as their exposure to injected and inhaled toxins (epigenetics).

By exploring behind the miasm through the early susceptibility to trauma, the case can be 'excavated' to enable a full reversal of symptoms. The primal years hold the key to understanding those aspects which dictate the reaction to future life challenges and disease susceptibility.

Many remedies will be explored in this context, including some lesser known ones: Agaricus, Bufo, Hura, Laurocerasus Off, Mancinella, Morphinum, Saccharum.
